

Control your sauna from anywhere - all you need is WiFi

Elite & WellAccess™

EFFORTLESS BATHING

The new multi-disciplinary control panel Elite from Tylö is packed with advanced features, thanks to its internal processor and operating system. In addition to highly personalized settings, the Elite can be individually programmed according to your own schedule.

Add features such as auxiliary fans, fragrance pumps or sound systems – the Elite control panel handles it all with clear and concise precision. The crystalline 4.5-inch screen delivers real-time status on every aspect of your sauna bath. Naturally, it includes steam and temperature settings and WiFi app-connectivity.

WELLACCESS™ - AN ALL-NEW CONTROL PANEL APP FOR MOBILE DEVICES AND COMPUTERS

In order to increase comfort, convenience and a better user experience adapted to people's everyday living patterns, we recently launched WellAccess™, an ingenious computer and smartphone app.

The user interface, developed for mobile devices and personal computers, perfectly emulates that of the sauna control panel. Through sensible engineering, the outcome is highly usable functionality, allowing sauna bathers to log on to the control panel through the smartphone app over their local WiFi network and remotely control most aspects of their sauna.

On both the control panel itself and via WellAccess™, it is possible to create and save several different user profiles and favourite settings, and set different schedules. In commercial settings, it is possible to manage multiple units from one point of access, and set unique profiles for different locations.

- Set temperature and humidity
- Can create multiple user profiles
- Control sauna/steam via WiFi and app
- Control several units at a time
- Set different schedules for different week days
- Set specific profiles for specific times or dates
- Instant fault notification

Pure

INTUITIVE DESIGN AND FEATURES

The elegant, compact design of Tylö's Pure control panel makes it the go-to choice for those who value functionality and advanced technology without compromising on aesthetics.

The ultra-thin black control lights up and lets you set the lighting, temperature and sauna time easily with only a few touches. Of course, choosing the default start time means you can step into a wonderfully hot sauna as soon as you get home.
