

Aquablu
Light

**Plug and play
natural salt
chlorinator
for above
ground pools**

AquaBlue Light is the ideal natural salt chlorinator for above ground pools and small pools of up to 30 cubic meters. AquaBlue light has durable UV resistant thermoplastic design and self-cleaning cell. It attaches seamlessly to any pool shape or form and is very easy to install, operate and maintain.

Using **AquaBlue Light** is the safest, most economical, natural and environment friendly form of purification for your swimming pool. No more odor, No more red eyes. Just immerse and attach is to the pool side, plug it in and let it keep your pool water sparkling clean while you are left only to enjoy them.

Features:

- Operates at ultra-low salt levels
- Simple plug and play
- Reverses polarity to help clean the cell
- Elegantly integrates with any pool design
- IP66 water ingress protection
